Product Description

MIRO Industries 3-R Bracket is designed to be inserted into the Model 3-R-2 to raise the roller to give a height clearance of 4". The 3-R Brackets are sold as a pair to be inserted into existing 3-R-2 roof supports. Bracket is used to convert the model 3-R-2 to a 3-R-4. Refer to 3-R-4 for specifications and limitations.
