

# J-STRINGER CROSSOVER\*

*The Next Generation of Rooftop Crossovers*

*\*Patent Pending*

- **SHORTER LEAD TIMES.**

J-Stringer Crossovers are an off-the-shelf stock item that do not require long lead times for customization.

- **EASY TO ASSEMBLE.**

Factory assembly is still offered, but the J-Stringer Crossover is simple enough to be assembled on site. Shipping unassembled may save freight costs.

- **MODULAR CONFIGURATION.**

The patent-pending, self-repeating J-Stringer part allows for various configurations.

- **SHIPS IN SMALLER CONTAINER.**

Every crossover between 1-step and 4-steps will fit on a standard pallet.

- **TIGHTER FOOTPRINT.**

Bases don't stick out like other crossovers, which means a smaller footprint and lower trip hazard.

Additional crossover options are available to accommodate a wide variety of applications. Visit [miroind.com](http://miroind.com) or contact your local Sales Representative to learn more.
